

I'm writing to express concerns about Low Power FM services taking over existing FM translator services such as K-Love Radio. K-Love Radio is a source of great encouragement to all & has great music. Many in our community look to KLOVE as our constant radio programming. We would be very disheartened if we were to lose this broadcast to another radio program. KLove radio is positive, encouraging music and it would be a detriment to our community if we couldn't have this uplifting station to listen to. Please do not allow LPFM station to be able to take over existing stations like K-LOVE radio. Thanks.
